

# 6

## Stencils in Original Size

### Making the Stencils

Cut out the stencil outlines and transfer them to a piece of light cardboard by tracing around them with a pencil; then make any necessary corrections to the contours. Cut the figure out of the cardboard and press onto the desired wax sheet. You can trace around the stencil with a needle and then cut out along the resulting contours with a knife or cutter. After a little practice, you'll soon be able to trace and at the same time cut out the stencil directly with a knife.
